

TECHNICAL DATA SHEET

INJECTOR CLEANER

PRODUCT DESCRIPTION

Injector Cleaner is a fuel additive that cleans fuel system of gasoline engines and improves engine performance by controlling deposit formation.

CHARACTERISTIC/ADVANTAGES

- Its special formula keeps fuel injector system clean.
- Controls and reduce deposit formation in fuel system, combustion chamber and inlet valves.
- Restores power and acceleration.
- Provides smoother idling and reduces noises.
- Prevents resin that occurs in valves at low temperatures.

APPLICATION

- Ensures more efficient engine operation by controlling deposit formation.
- Recommended for use in the injectors of gasoline engines.

USAGE

- Use in injection system cleaning machines: Used by mixing 1 (200 ml) additive for 750 ml of fuel in 4-cylinder engines; 1.5 (300 ml) additive for 1 liter of fuel in 5-6 cylinder engines; 2 (400 ml) additive for 1.5 liter of fuel in 8-cylinder engines. For each application, consider the instructions of the cleaning machine.
- Use in fuel tank: Add 1 (200 ml) additive to 50 liters of fuel in every 5000 km.
- For the optimum results, first Injector Cleaner should be filled into the fuel tank, and then the fuel.

HEALTH AND SAFETY RECOMMENDATIONS

It is flammable, so must be kept away from fire and sparks. Eye contact should be avoided. In case of eye contact, wash with plenty of water. If contact with skin, wash the area immediately with plenty of water and soap. In case of skin irritation or redness caused by contact, seek advice of your doctor immediately. For more information contact Material Safety Data Sheet (MSDS).

The vehicle and equipment manufacturers specifications and relevant international standards were taken into consideration while preparing the content of this Technical Data Sheet.
