## TIRE REPAIR FOAM

### PRODUCT DESCRIPTION

Tire Repair Foam is a tire repair product that repairs and inflates punctured tires in a short time without dismantling.

### CHARACTERISTIC/ADVANTAGES

- Instantly repairs a flat tire without the need for disassembly and allows the car to travel at medium speed.
- No damage to tire and wheel.

### APPLICATION

- Recommended for use in all passenger cars, motorcycles, bicycles, light commercial vehicles or caravans.
- Can be used on all car brands and models and all rim types.
- A tire repair product that repairs and inflates flat tires in a short time without requiring replacement.
- With its special formula of rubberizing in contact with air, the product repairs your flat tire and can inflate it up to 20 psi.

### USAGE

- Park your vehicle so that the valve of the flat tire does not press on the ground. Shake the product before use. Screw the nozzle of the hose on the product into the tire valve. Keep the spray upright. Remove the black safety cap on the product.
- Press the button on the top fully and pour the entire chemical compound of the spray into the tire. Once the hose is removed and valve cap is placed, it is necessary to drive without delay. In this way, the material is centrifuged and evenly distributed in the tire.
- This product should be used only in emergency situations, the vehicle should not be used at very high speeds after using the product, and tire inflation should be adjusted at the nearest gas station.
